Introduction

AntWeb is a taxonomic database maintained by the California Academy of Sciences (CAS) and houses the largest collection of ant specimens in the world (Ward 2013). The database contains 489 unique genera and 10536 unique species at the time of this writing.

How many species are there in Madagascar?

```
#> Query contains 108189 results. First 1000 retrieved. Use the offset argument to retrieve more.  
#>  
#> 108189 results available for query.
